Section 1 Getting to Know Your Camcorder

Overview

The camcorder equipped a 5 Mega Pixel sensor that can take H.264 format videos. The H.264 technology allows for extanded video recording with less memory. High quality images up to 16 mega-pixels can also be delivered smoothly. With a color LCD monitor, you can view and examine the videos and photos easily.

The camcorder features 7.6 cm LCD (3" LCD) touch panel which is an ideal platform for you to operate your camcorder. The menu options are accessible with your finger. With the touch panel, you can select the options directly and quickly.

The camcorder also features video recording at an HD resolution of 1920x1080. You can also connect it to an HDTV via an HDMI cable, and easily playback the recorded high-definition videos on the wide screen HDTV.

Moreover, the camcorder has an advanced uploading feature. With the exclusive built-in **Internet Direct** application, you can upload the videos captured by the camcorder to the web site more effortlessly.

ISO sensitivity and color balance can either be adjusted automatically or changed manually. A 120x digital zoom helps you to control over the videos and photos you take.

The varied effect options, such as Time Lapse, Slow Motion and different Scene, make recording more fun.

The built-in memory allows you to take photos and to record videos without a memory card. The memory card slot allows users to increase the storage capacity.

Note

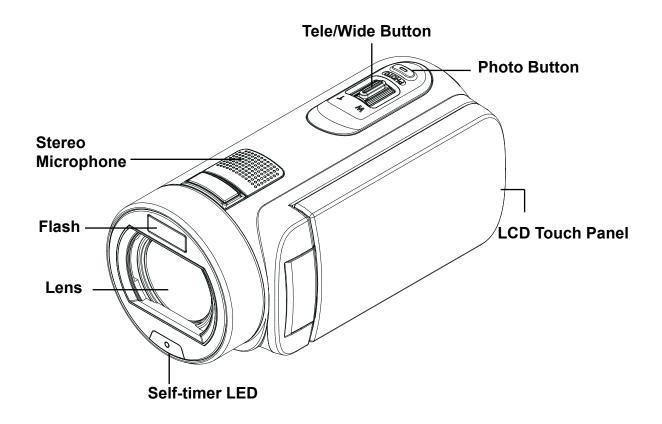

- Partial memory of the built-in memory is used for the camcorder's Firmware code and software.
- Install the bundled software application on the CD, ArcSoft MediaImpression, for viewing the videos correctly on a PC.
