This section contains important information on safe and efficient operation. Please read this information before using the device. Ignorance of the following notices may lead to violations of the law.

- Before using the device, please make sure you have fully charged the battery.
- Do NOT remove the battery from the device during charging.
- Before inserting SIM card into the device, make sure that the device is switched off.
- Keep the battery in low battery status for long time might cause battery over-discharged or even reduce battery life. To maintain battery in good lifecycle please recharges it once in low battery.
- Please fully charge the battery if you are going to leave the phone without use for long time to prevent battery goes over-discharged.
- Do NOT attempt to disassemble the device on your own. This should be done by an authorized person.
- Use the device in accordance to instructions when in public facilities.
- In some countries, it is a violation against the law to record phone conversations. Always ask permission of the other party when you are going to record a conversation.
- To protect your ears, turn down the volume before you use stereo headsets or other audio devices.
- To avoid damaging the touch screen and the device, do NOT apply excessive pressure on them, and remove the device from your pants' pocket before you sit down. It is also recommended that you only use the stylus or your finger to interact with the touch screen. It is not covered by the warranty that you crack the touch screen because of the improper usage.
- When you use the device for a long time, such as talking on the phone, browsing online, or charging the battery, the device may become warm. In most cases, this condition is normal.
- Refer servicing to the provider, or an authorized technician under the following conditions: 1. The device has been damaged. 2. When you follow the instructions to use your device, it does not operate normally. 3. The device has been exposed to water. 4. Liquid has been spilled or an object has fallen onto the device.
- Do NOT push unauthorized objects into slots and openings in your device.

This section contains important information on safe and efficient operation. Please read this information before using the device. Ignorance of the following notices may lead to violations of the law.

- The device should be placed away from heat sources such as stoves, radiators, heat registers, or other products that produce heat.
- Condensation may form on or within your device, when you move your device between environments with very different temperature and/or humidity ranges. To avoid damaging your device, make the moisture to evaporate before you use the device.
- To avoid damaging your device, do NOT put your device on an unstable table, stand, bracket, or other places.
- Before you clean your device, unplug it, please. Use a damp cloth for cleaning, but do NOT use water, liquid cleaners, or aerosol cleaners to clean the touch screen.

1.2 Installing or uninstalling the SIM Card, Battery, and Memory Card

To install the SIM card

There are two SIM card slots.

SIM1 use with Micro SIM card and SIM2 use with Mini SIM card.

Right slot is for SIM1 (WCDMA+GSM) and left slot is for SIM2 (GSM).The gold contacts are facing down. And the cut-off corner is facing toward the inside.

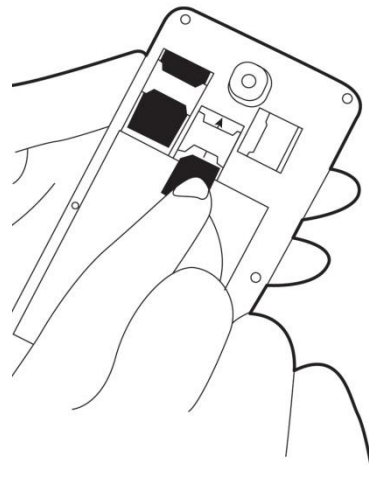

To install the SIM1 card

To remove the SIM card

Please turn off your phone first.

Use your finger to slide the SIM card out of card slot.

To install the SIM2 card

Battery

Your phone comes with a rechargeable battery. Battery life varies depending on the network, used applications, and the type of connections attached to your phone.

Memory card

You may need a micro SD card to store photos, music, videos and other data. You can also move certain apps to the storage card, if the apps support this feature.

To install the memory card

1. Hold the phone face up.
2. Open the microSD card cover by sliding it left forward), and place the microSD card (contacts facing down).
3. Slide right forward the microSD card cover to lock the microSD card inside the slot.

To remove the memory card

1. For safe removal, tap Applications tab > Settings > Storage > Unmount SD card > OK.
2. Hold the phone face up and the top panel facing you.
3. Slide left forward the microSD card cover and take out the microSD card. Once done, slide right forward the microSD card cover to lock up the slot.

1.3 Charging the Battery

When you take your phone out of box for the first time, the battery isn't at full power. Please charge the battery fully before using.

1. Connect the USB cable to the AC adapter, and then, connect to the device via the USB cable.
2. Plug the AC adapter to a socket to start the charge.
3. For phone's safety, please only use the original charger that comes with your device. Any possible damage caused by using non-original charger or any other equipment will not be under GIGABYTE Communication Inc.'s responsibility.

NOTE:

To ensure safety, do not remove the battery from the phone while the AC adapter is connected or while it is being charged.

1.4 Turning the Phone on or off

To turn on your phone

Press and hold the power button until the phone shortly vibrates.

To turn off your phone

1. Press and hold the power button for several seconds.
2. A pop-up window appears, then tap “Power off”.
3. Select “OK” to confirm.

To set your phone to the sleep mode

To set your phone to the sleep mode, press the power button briefly. It will turn the display off. To turn the display on, press the power button briefly again.

1.5 Lock/Unlock

Unlock the device

Drag **G** icon on screen and slide to  for unlocking the device.

1.6 Contacts

“Contacts” is your phonebook that you can store friends’ names, phone numbers, e-mail addresses and other information. “Contacts” can connect to your Google, corporate accounts, and integrate your contact information.

Adding a Contact

Tap Applications tab > .

Tap  > tap  to add a new contact.

Choose where you want to synchronize the new contact with Google account, Phone, SIM1 or SIM2.

A new contact screen appears.

Tap each field to fill out the contact information.

Tap “DONE” to save it.

NOTE:

The SIM card contact can't add picture to contact information.

Searching for Contacts

On Contact Screen, follow the step to easily search for contacts:

- Tap  to type the first few letters of the contact name to search. The list is filtered when typing. When finishing searching, you could tap  to go back to the contacts screen.

1.7 The Home Screen

On Home Screen, you can quickly access common features and view notifications of missed calls, received messages, battery, and the status of the connection.

Default Home Screen: Main functions.

Favorites Tray can keep your most important shortcuts and folders.

Tap to launch Application Drawer.

You can slide the Home Screen from the left side to the right side or from the right side to the left side to switch it. The icons located at the bottom of the home page have different functions:

Self-defined Home Screen: You can add the shortcuts and widgets.

Tethering or hotspot active

Tap to turn on/ off network.

Enable/disable Wi-Fi.

Enable/disable Bluetooth.

Enable/disable Google Location Service™.

Enable/disable Data Synchronization.

Tap to adjust the brightness.

Status Icons

The icons of the status bar indicate different types of information. Tap the status bar and scroll down to view notifications or view system information.

When there is an incoming call:

- The phone will ring with the ring volume is turned on.
- A notification message will appear on the screen.

Ending a call

Tap . It's the end icon to end a call.

2.2 Creating and sending a text message

Your phone offers several ways to create and send a new text message.

From Message screen

1. Tap Applications tab > .
2. Tap to create a new message.
3. In the “To” field, enter the recipient’s phone numbers or tap to add from your contacts.
4. Type your message in the “Type message” field.
5. Tap to send your message.

NOTE:

If you insert SIM1 and SIM2 at the same time, the Message service will be set as default. You can set the default from the status bar on Message screen.

From Contact screen

1. Tap Applications tab > .
2. Tap a contact to display the contact information.
3. Tap the icon to compose the message.
4. Tap to send your message.

NOTE:

If you exit Messages before sending, unsent message will be saved as a draft automatically.

Google keyboard

Tap to active Capital letter mode.

Tap to activate the symbols and numerical keyboard.

Tap to input symbols.

Tap to delete words.

2.3 Multimedia Message

A Multimedia message or MMS can contain letters, an image, an audio, or a video file.

To send MMS from Message screen

1. Tap Applications tab >  .
2. Tap  to create a new message.
3. Enter the recipient's phone numbers in the "Type name or number" field
4. Tap  to attach picture, video, record audio, contact, pictures, videos, audio or calendar. The message converts to a MMS message automatically.
5. Enter your message with the on-screen keyboard in "Type text message" field.
6. Tap  to send your message.

3.1 Wi-Fi

Your device can connect to the detected network through Wi-Fi.

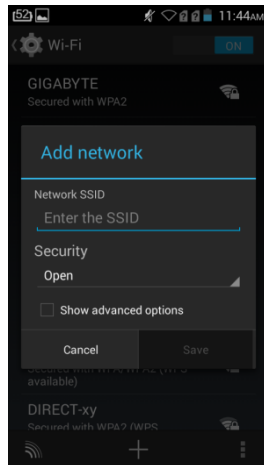

1. Tap Applications tab >  > Wi-Fi.
2. Switch to turn “Wi-Fi” on or off.

To connect to a Wi-Fi network

1. Tap “Wi-Fi”, check Wi-Fi function and turn it on. Begin to search the available Wi-Fi networks.
2. Detected networks are displayed below. Tap one network then tap “Connect”.
3. If you select an open network, the connection is established automatically.
4. To connect a secured connection, you will be prompted for the password. Enter the password then tap “Connect”.
5. When Wi-Fi is connected, the connection icon  will be displayed on the status bar.

To add Wi-Fi network

1. Tap Applications tab >  > Wi-Fi.
2. In Wi-Fi screen, tap  . An on-screen window will pop-up.

3. Follow the on-screen instructions and enter the necessary information, then tap “Save” to save the settings.

3.2 Bluetooth

Bluetooth on your phone operates in three different modes:

On: Bluetooth is turned on. Your phone detects other Bluetooth devices, but your phone is not visible to others.

Discoverable: Bluetooth is turned on and your phone is visible to other Bluetooth devices.

Off: Bluetooth is turned off.

To turn Bluetooth on or off

1. Tap Applications tab >  > Bluetooth.
2. Switch or tap to turn it on.
3. Tap “Bluetooth” to view the menu options.
4. Tap the device’s name to make your device visible to others.

To connect to Bluetooth devices

A connection to a Bluetooth device is called a partnership. You need to pair and create a partnership with a Bluetooth device to exchange information.

1. Tap Applications tab >  > Bluetooth.
2. Tap “SEARCH FOR DEVICES” to search for a new device.
3. Detected Bluetooth devices are displayed on the screen. Tap one device to connect.
4. Start to pair, enter the password, and then tap “OK” to finish pairing.

4.1 Camera

Your phone is equipped with an 5MP camera to take photos and videos.

Camera Function

Switch between photo, video and panoramic mode.

Tap to take a photo.

Tap to record a video.

Displays the last image.

Display the flash mode.

Switch between rear and front camera.

Configure camera settings.

Taking a photo

1. Tap Applications tab > . The screen switches to landscape view automatically.
2. Tap to take a picture.

Recording a video

1. Tap Applications tab > .
2. Switch to recorder mode.
3. Aim the phone at the subject.
4. Tap to start to record, tap again to stop recording.

4.2 Music

You have to copy your audio files to the storage card before playing music, because the music player only plays audio files saved in the storage card of your phone. Tap Applications tab >  .

Playback screen: Displays the playback area with the playback controls.

Pre-installed Programs Intro.

6.1 Protecting Your Phone

You can protect your phone from unauthorized users in a few different ways.

Set up PIN Protection

1. Tap Applications tab >  > Security > Screen lock > PIN.
2. Enter your PIN, and then, tap “Continue”. Confirm your password, then, tap “OK”.
3. If you want to disable screen lock security, please tap Application Drawer >  > APPS tab > Security > Screen lock. Confirm your PIN, and then, tap “Continue”. Tap “None” to disable it.

Set up Unlock Pattern

You can further secure your data by locking the screen and requiring a screen unlock pattern every time after your phone is turned on or it wakes up from the sleep mode every time (screen is off).

1. Tap Applications tab >  > Security > Screen lock > Pattern.
2. Draw the unlock pattern by connecting at least four dots. Then tap “Continue”.
3. Draw the unlock pattern again, and then, tap “Confirm”.

4. If you want to disable the function, please tap Applications tab >  > Security > Screen lock. Confirm the saved pattern, and then, tap “None” to disable it.

Enable the PIN of the SIM card

When the PIN is enabled, you are required to enter the PIN before using the phone.

1. Tap Applications tab >  > Security > Set up SIM/RUIM card lock.
2. Tap “SIM1” or “SIM2” (If SIM2 inserted).
3. Check “Lock SIM card”. Input the PIN, and then, tap “OK”.

6.2 Reset Your Phone

With Clean Boot, you can reset your phone to its factory defaults. When you reset your phone, the data stored in your phone may be erased.

1. Tap Applications tab >  > Reset to factory settings .
2. Tap Factory data reset> Reset phone > Erase everything to reset the phone.

NOTE:

Before resetting your device, please remember to back up all your data and information.
