2 Getting Started

2.1 Remove/Insert Battery

You may need to remove the battery to insert SIM cards, Memory

User Guide

card or for replacing the battery.

To remove the battery:

1. Invert the back of the mobile phone upward and take off the rear cover according to the following figure.

2. Take out the battery as shown in the following figure.

3. Finally place back the rear cover of the mobile phone after

User Guide

removing/inserting the battery as required.

Note: When inserting the battery, ensure that the metal teeth at the top of the battery comes in contact with the corresponding metal slots of the mobile phone. After this, press the battery down to insert the battery in place.

2.2 Insert SIM Card

The Q36 is a triple SIM mobile phone allowing you to use two GSM Cards and one UIM (CDMA) card. To insert the SIM card(s):

1. Switch off the mobile phone and remove the rear cover and battery.
2. Insert the SIM cards correctly in the SIM slot(s) as shown below.

3. Finally, insert the battery and replace the rear cover of the mobile phone.

2.3 Insert Memory Card

Use only compatible memory cards approved by Micromax. Incompatible cards may damage the slot or corrupt the data stored in the card.

To insert the memory card:

1. Switch off the phone and remove the rear cover and the battery.

User Guide

2. Open the memory card slot, and insert the memory card into the slot.

3. Close the memory card slot.
4. Finally, insert the battery and the rear cover of the mobile phone.

2.4 Charge the Battery

You can charge your battery via the charger or the USB cable supplied with this phone.

1. Connect the charger to the charger jack on the phone.

User Guide

2. Connect the charger to a power socket. The charging starts, with the charging icon displayed in an animated state.

3. When the charging icon becomes static, it indicates that the battery is full.

4. Disconnect the charger from the power socket and the phone after charging.

Note: Slight heating during charging is normal. When the charging icon becomes static, it indicates that the battery is full.

3 Basic Operations

3.1 Switch Phone ON/OFF

To switch ON your phone, press and hold the **End key** for a few seconds.

To turn OFF your phone, press and hold down the **End key** for a few seconds.

3.2 Unblock SIM/UIM Card

To eliminate unauthorized usage, SIM card can be locked by adding PIN1 number in security settings. If PIN lock is activated, PIN1 must be input every time the mobile is switch on.

If PIN is input 3 consecutive times, the SIM card will be locked by the network. In this case, contact your network provider to resolve this issue.

Note: The network supplier will set a standard PIN1 (between 4 to 8 digitals) for your SIM card. Please change it to your personal pass word. For detail please see Security settings. The operations with UIM card are similar with SIM card.

User Guide

3.3 Unbck SIM/UIM Card

To eliminate unauthorized usage, your phone can be locked by adding a phone password in security settings.

If you forget the mobile phone password, please contact the local sales branch or service center to unlock the mobile phone.
(Default mobile phone password is 0000).

3.4 Make a Call

You can make a call in the following ways:

- Enter the desired number in standby mode and press the **Call key**.
- Go to **Menu> Phonebook** and then dial the desired number.
- Just press the **Call key** or the **G1** key to dial the contacts listed in Call logs.
- You can also dial a contact from the messages.
- For international calls, add the + character that replaces the international access code, and enter the

User Guide

country code, area code (omit the leading 0, if necessary), and phone number

3.5 Answer a Call

To answer a call, press the **Send** key or select **Options> Answer**.

3.5.1 Options during a Call:

When you are connected, pressing the **G2 key** gives you these options:

- **Hold Single Call:** The Caller and receiver will not hear each other. Enter **Options** again and choose **Retrieve Single Call** to go again connect with the other end.
- **End Single Call:** Choose this to end the current call.
- **New Call:** This is dependent on the network. If supported by network, you may dial another number while engaged in a call.
- **Phonebook:** While engaged in a call, you may browse the phonebook and make a new call.

User Guide

- **Messages:** While engaged in a call, you can browse and/or send/receive SMS.
- **Mute:** Your voice can not be heard at the other end if you mute the call.
- **DTMF:** the digits entered can be interpreted as a DTMF signal response at the other end. This can offer dialing to the telephone numbers with extensions or IVR(interactive voice response) systems for menu driven options.

3.6 Reject a Call

To reject a call, press the **End** key

3.7 Mute a Call

Press **Options** and then **Mute** while a call is active.

3.8 Hold a Call Conference

You can talk with more than one person at the same time through call conference.

- 1.While on a call, go to phonebook and dial a contact. Once the

User Guide

new call gets connected, the first call will be put on hold.

2. After this, press **Options** and then choose **Conference**.

Note: This is network dependent and you may need to contact your network operator for this.

3.9 Swap a Call

1. While on a call, go to phonebook and dial a contact. Once the call gets connected, the first call will be put on hold.
2. After this, press **Options** and then choose **Swap**. The active call and the call on hold will be swapped.

4 Phonebook

Your phonebook stores all your saved contacts for anytime use. Your phonebook data can be stored in your SIM card or your phone memory. You can access your phonebook by going to:

Menu > Phonebook

User Guide

4.1 Add New Contact

Menu > Phonebook

To add a new contact:

1. Select **Menu > Phonebook** and press the **Up** navigation key once. Then press the **OK** key.
2. Press **Select** and the choose storage location such as phone or SIM to store your contact.
3. Enter the desired contact name and number and press **OK** key.

4.2 View Contact Detail

Menu > Phonebook > OK Key> View

You need to highlight the contact to view its detail

- **Search Audio Devices:** Search for hands-free devices that supports Bluetooth. Pairing up with Bluetooth-enabled audio devices allows you to exchange audio or video information with such devices.
- **My Name:** View or change the name of my phone as it appears to other Bluetooth devices.
- **Advanced:** Set your Bluetooth preferences. You need to first activate Bluetooth to perform advanced settings.

14 Safety Precautions

Please read these simple guidelines. Not following them may be dangerous or illegal.

About SAR

- Your phone is a low-energy radio frequency receiver and transmitter. Upon switching on, your phone will emit low-level radio frequency (RF).
- The specific absorption rate (SAR) is a measurement unit of body-absorbed RF quantity when the phone is in use.
- The SAR value is ascertained according to the highest RF level generated during laboratory tests. The true SAR level when the phone is operated will be far lower than this level. The nearer the phone is from a base station, the lower is the RF energy emitted by the phone.
- The highest SAR value is 0.412 W/kg averaged over 10 gms of human tissue.

SAR Recommendations

User Guide

- Please keep your calls short and use SMS whenever more convenient. This advice applies especially to children, adolescents and pregnant women
- Prefer to use your cell phone when the signal quality is good.
- People having active medical implants should preferably keep the cell phone at least 15 cm away from the implant.
- Maintain a preferable distance of 15 mm from the device..

Safe Driving

- Do not use the phone while driving. When you have to use the phone, please use the personal hands-free kit.
- Please put the phone safely in the phone stand. Do not put it onto any passenger seat or any place from which it may fall down in case of vehicular collision or emergency braking

During Flight

- Flight is influenced by interference caused by the phone. It is illegal to use a phone on the airplane. Please turn off your phone during a flight

User Guide

In Hospitals

- Your Phone's radio waves may interfere with the functioning of inadequately shielded medical devices. Consult a physician or the manufacturer of the medical device to determine whether they are adequately shielded from external Radio Frequency. Switch off your device when regulations posted instruct you to do so.
- To avoid potential interference with implanted medical devices such as a pacemaker or cardioverter defibrillator:
- Always keep your phone at least 15.3 centimetres (6 inches) from the medical device.
- Do not carry the wireless device in a breast pocket.
- Turn off the phone if there is any reason to suspect that interference is taking place.
- Follow the manufacturer directions for the implanted medical device.
- If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

Unsafe Areas

- Please turn off your phone when you are close to a gas station or in

User Guide

the vicinity of any place where fuel and chemical preparations, or any other dangerous goods are stored.

15 Taking Care of Your Device

Your device is a product of superior design and craftsmanship and should be handled with care: The following suggestions will help you protect your phone:

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will rust electronic circuits. If your device does get wet, remove the battery without turning on the device, wipe it with a dry cloth and take it the service center.
- Do not store the device in high or cold temperature. High temperatures can shorten the life of electronic devices and damage batteries.
- Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.
- Do not store the device in high or cold temperature. High temperatures can shorten the life of electronic devices and damage batteries.

User Guide

- Do not attempt to open the device other than as instructed in this guide. Repairing this phone by yourself other than our authorized service agents/centers goes against the warranty rules.
- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device. Only use a soft, clean, dry cloth to clean the surface of the device.
- Do not store your device near magnetic fields or allow your device to come in contact with magnetic fields for extended period of time.
- Use manufacturer approved batteries, chargers, accessories and supplies. Micromax will not be held responsible for user's safety when using unapproved accessories or supplies.

Disclaimers:
