# Introduction

Thank you for purchasing the P001. Before using your P001, be sure to read the P001 Basic Manual (this PDF manual) to ensure correct usage. After you have finished reading this manual, store this PDF manual and the printed manuals in safe places so you can retrieve them whenever you need them.

## Manuals for the P001

The P001 comes with the Basic Manual and Instruction Manual.

- **For learning the basics:**

Read the P001 Basic Manual (this manual).

- **For learning details on using each function:**

Read the supplied P001 Instruction Manual (Japanese). Be sure to read the Safety Precautions “安全上のご注意” to ensure proper usage of the P001.

The keyword searchable au Online Manual is also available on the au homepage:

<http://www.au.kddi.com/manual/index.html>

- To access from EZweb: When the standby screen is displayed, press  ⇒ *au one Top*  
⇒ *auお客様サポート* (au Customer Support) ⇒ *オンラインマニュアル* (Online Manual)

| ⑥ |                  | ⑫ |                  |

## Note on Screenshots

The screenshots in this manual are simplified and may look different from the actual cell phone screens. Also, part of screen may be omitted.

- The display design themes of the P001 vary by model color. The screenshots for the Chianti Red models are used in this manual.

## Notes on Cell Phone Use

### Cell Phone Etiquette

The cell phone always emits weak radio waves when power is on.

Use the cell phone in an enjoyable and safe manner without forgetting to be considerate of others around you.

- **Use of cell phones is not allowed in some places.**
  - Do not use the cell phone while you are driving. Doing so is both dangerous and prohibited by law.
  - Using a cell phone in an aircraft is prohibited by law. Be sure to turn the cell phone off.
- **Radio waves from cell phones may interfere with medical electrical equipment.**
  - Some people close to you in crowded places such as packed trains may be using a cardiac pacemaker. Turn the cell phone off in such places.
  - Abide by the rules of hospitals and other medical institutions where it is forbidden to use or carry cell phones.
- **Be considerate of where you use the cell phone and how loudly you talk.**
  - Do not make calls in theaters, museums, libraries, and other similar places. Turn power off or turn on manner mode not to disturb others around you by ring tones.
  - Do not use the cell phone on a street where you might interrupt the flow of pedestrians.
  - Move to areas where you will not inconvenience others on trains or in hotel lobbies.

- Refrain from talking in a loud voice.
- Obtain the permission of other people before you take their photos with the cell phone's camera.
- Do not record information with the cell phone's camera in bookstores and other locations where taking photos is not permitted.

### Do Not Use the Cell Phone While Driving!

**Turn off your cell phone or put it in Drive Mode while driving.**

Do not use the cell phone while driving a car/motorcycle or riding a bicycle. It may result in a traffic accident. Using a cell phone while driving is prohibited by law. Using a cell phone while riding a bicycle may also be punishable by law.

#### Prohibited!

- Looking at a cell phone display
- Talking on a cell phone while holding it

#### Drive Mode

In Drive Mode, a Japanese message meaning "I'm driving now, so I can't answer your call." is played when a call is received, and asks the caller to leave a message on the Answer memo.

When the standby screen is displayed, press  マナー, use  to select *Drive*, and then press  (Set).

## Disaster Message Board Service

When a big scale disaster occurs, you can register your safety information from EZweb. The registered information can be referred from anywhere in Japan from EZweb or Internet.

### Registering safety information

- When a big scale disaster occurs, from an au phone, you can register your safety information (i.e. your condition and comments) to the 災害用伝言板 (Disaster Message Board) created on the EZweb.
- After registration of your safety information, e-mail is sent to your family or acquaintances you have previously designated to notify that your safety information has been uploaded to the 災害用伝言板 (Disaster Message Board).

### Inquiring for safety information

- You can inquire for safety information of a person by entering his/her phone number from EZweb or Internet.\*  
\* To inquire from other carriers' cell phone, a PHS or PC, access "<http://dengon.ezweb.ne.jp/>".

### Access

When the standby screen is displayed, press  ⇒ *au one Top* ⇒ 災害用伝言板 (Disaster Message Board)

<http://dengon.ezweb.ne.jp/>

- The maximum storage period of the registered information is 72 hours.
- The maximum available number of registrations is 10 per phone number. When the number of registrations exceeds 10, the oldest one is overwritten.
- The demonstration of this service can be referred to anytime. When the standby screen is displayed, press  ⇒ *au one Top* ⇒ *auお客様サポート* (au Customer Support) ⇒ 調べる (Search) ⇒ 災害用伝言板 (デモ版) (Disaster Message Board (Demo Version)).
- To view the Disaster Message Board in English, select *English* from the top menu of the Disaster Message Board.

EZweb is an information service that allows you to enjoy browsing the Internet on your cell phone. You can also download Chaku-Uta-Full®, Chaku-Uta®, news, and other contents from web pages.

To use EZweb, you need to apply for an EZweb subscription. If you did not apply for an EZweb subscription at the time of purchase, contact an au shop or the au Customer Service Center. Also, before use, you need to configure initial settings.

- The packet communication charge for EZweb connection applies to the amount of data sent and received, not to the length of time connected.
- In addition to communication charges, some sites charge for providing information.

# Specific Absorption Rate (SAR) of Cell Phone

## SAR Certification Information

This model cell phone P001 meets the MIC's\* technical regulation for exposure to radio waves.

The technical regulation established permitted levels of radio frequency energy, based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies.

The regulation employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit is 2 watts/kilogram (W/kg)\*\* averaged over ten grams of tissue.

The limit includes a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The value of the limit is equal to the international guidelines recommended by ICNIRP\*\*\*.

All cell phone models should be confirmed to comply with the regulation, before they are available for sale to the public. The highest SAR value for this model cell phone is 0.433 W/kg. It was taken by the Telecom Engineering Center (TELEC), a Registered Certification Agency on the Radio Law. The test for SAR was conducted in accordance with the MIC testing procedure using standard operating positions with the cell phone transmitting at its highest permitted power level in all tested frequency bands. While there may be differences between the SAR levels of various cell phones and at various positions, they all meet the MIC's technical regulation. Although the SAR is determined at the highest certified power level, the actual SAR of the cell phone during operation can be well below the maximum value.

## Electromagnetic Waves

- For body worn operation, this cell phone has been tested and meets RF exposure guidelines when used with an accessory containing no metal and positioning the cell phone a minimum 1.5 cm from the body. Use of other accessories may not ensure compliance with RF exposure guidelines.

## FCC Notice

- This device complies with part 15 of the Federal Communications Commission (FCC) Rules. Operation is subject to the following two conditions:
  - (1) This device may not cause harmful interference, and
  - (2) this device must accept any interference received, including interference that may cause undesired operation.
- Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

**Note:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## ■ FCC RF Exposure Information

### **THIS MODEL CELL PHONE MEETS THE U.S. GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO RADIO WAVES.**

Your cell phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the United States (U.S.) Government.

The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to

assure the safety of all persons, regardless of age and health. The exposure standard for wireless cell phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg\*. The tests are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC for each model.

The highest SAR value for this model cell phone when tested for use at the ear is 0.559 W/kg and when worn on the body, as described in this user guide, is 0.544 W/kg. Body-worn Operation; This device was tested for typical body-worn operations with the back of the cell phone kept 1.5 cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5 cm separation distance between the user's body and the back of the cell phone. The use of beltclips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided. The FCC has granted an Equipment Authorisation for this model cell phone with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model cell phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/ea/> after searching on FCC ID WV2108001A.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) website at <http://www.phonefacts.net>.

\* In the United States, the SAR limit for wireless cell phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. SAR values may vary depending upon national reporting requirements and the network band.

## Important Safety Information

### • AIRCRAFT

Switch off your wireless device when boarding an aircraft or whenever you are instructed to do so by airline staff. If your device offers a 'flight mode' or similar feature consult airline staff as to whether it can be used on board.

### • DRIVING

Full attention should be given to driving at all times and local laws and regulations restricting the use of wireless devices while driving must be observed.

### • HOSPITALS

Cell phones should be switched off wherever you are requested to do so in hospitals, clinics or health care facilities. These requests are designed to prevent possible interference with sensitive medical equipment.

### • PETROL STATIONS

Obey all posted signs with respect to the use of wireless devices or other radio equipment in locations with flammable material and chemicals. Switch off your wireless device whenever you are instructed to do so by authorized staff.

### • INTERFERENCE

Care must be taken when using the cell phone in close proximity to personal medical devices, such as pacemakers and hearing aids.

### • Pacemakers

Pacemaker manufacturers recommend that a minimum separation of 15 cm be maintained between a cell phone and a pacemaker to avoid potential interference with the pacemaker. To achieve this use the cell phone on the opposite ear to your pacemaker and do not carry it in a breast pocket.

### • Hearing Aids

Some digital wireless cell phones may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer to discuss alternatives.

### • For other Medical Devices:

Please consult your physician and the device manufacturer to determine if operation of your cell phone may interfere with the operation of your medical device.
